In the event of players within each group tying on points the following elimination procedure will be applied, between those that tie:-

- 1. Matches won will first decide the winners.
- 2. If two or more players in any Group have an equal number of wins the following procedures will apply to determine the position of the qualifiers of that group:-
- a.) If two or more players have an equal number of wins, the better or best will be the player with the best Frame Difference.
- b.) If still equal, the results of the matches between the players concerned will be the determinant for the winner between them.
- c.) If a tie is still involved, the best differential in the matches of the tied players will be the determinant.
- d.) If the end result is still equal a re-spotted black will be the final decider.

From each group one, two or four qualifiers are promoted to the last sixteen/eight/four to commence the knockout stage
